Size Options

To aid in product selection, the approximate outer dimension of the catheter French (FR) size is shown below. Additionally, the color of the funnel end corresponds to FR sizes for fast, easy identification.

Find Your Ideal Solution

The Cure Medical line of intermittent catheters includes options for men, women, and children. Traditional and innovative styles featuring advanced technologies are designed to provide a safe, clean, fast, and convenient cathing experience.

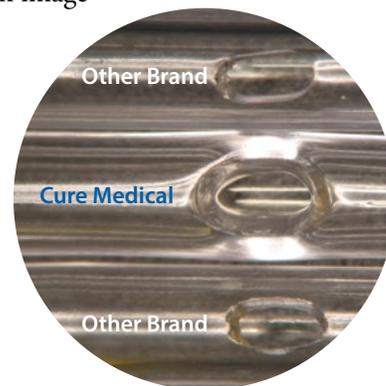

Cure Medical products offer multiple benefits:

COMFORT
Smooth, fire polished eyelets

Manufacturing processes and material choices for Cure Medical intermittent catheters are intended to offer an assurance of safety and comfort. For example, instead of using a less expensive eyelet 'punch' technique, all eyelets on all Cure Medical catheters are fire polished. This not only helps aid in smooth insertion, it is designed to help minimize friction that can lead to infection.

A photomicrograph image shows an eyelet on a Cure Medical catheter (middle) compared to an eyelet on other catheter brands.

The difference in quality between the Cure Medical catheter eyelet and the other brands is clearly seen – and it can be felt!

RESEARCH
We support medical research

Financial support for medical research has been a core differentiator since the founding of Cure Medical.

INNOVATIVE OPTIONS. BENEFICIAL SOLUTIONS.

SAFETY

Not made with DEHP/DINP, BPA, or Natural Rubber Latex

By investing in advanced technology and using high quality manufacturing materials, Cure Medical helps catheter users experience safety, comfort, and peace of mind. Not every catheter manufacturer can make this statement.

Some other catheter manufacturers use Di(2-ethylhexyl) Phthalate (DEHP) or Diisononyl Phthalate (DINP) as an economical way to make catheters flexible – even though these phthalates are included in a published list* of chemicals known to "...cause cancer, birth defects, and reproductive harm".

Additionally, Natural Rubber (NR) Latex may be used by other catheter manufacturers – even though it can cause serious allergic reactions.

In contrast, Cure Medical catheter users can be assured that the product does not put them at risk of exposure to DEHP/DINP, BPA, or NR-Latex.

[CLICK to learn about DEHP](#)

VALUE

'Upgrade Quality' and 'Reimbursement Friendly'

Fire polished eyelets, high quality materials, and innovative product designs are just a few examples of features that you might expect on a premium priced product. However, these 'Upgrade Quality' Cure Medical catheter features are uniquely combined with 'Reimbursement Friendly' availability.**

*<https://www.p65warnings.ca.gov>

**US only. Respects most reimbursement models. Contact your local healthcare product supplier for exact pricing.

USER FRIENDLY

Patient-centric packaging, products, and support

With a foundation of catheter user input, Cure Medical product features are designed to facilitate ease of use and help increase independence.

Evidence of this pursuit can be seen in features such as: a blue Control Stripe on catheters with a coude tip to help guide insertion orientation; packaging with dual openings or reinforced Finger Loops; Grippers and Sleeves to enable clean, controlled 'No Touch' use, and proprietary product features that support individuals with limited dexterity.

The same patient-centric perspective that drives product and packaging innovations also influences support strategies for improving overall well-being.

A unique, social platform called Cure Nation is designed to provide relevant information and enable catheter users to share life enhancing articles online and through a free eNewsletter.

[CLICK to join the Cure Nation](#)

Resources such as product guides, instructional videos, and book downloads are offered online to help support catheter users. Additionally, a backpack with custom flashcards and coloring book are offered to help teach a child 'How To Cath'. Crayons and a trinket add some fun to the educational resource.

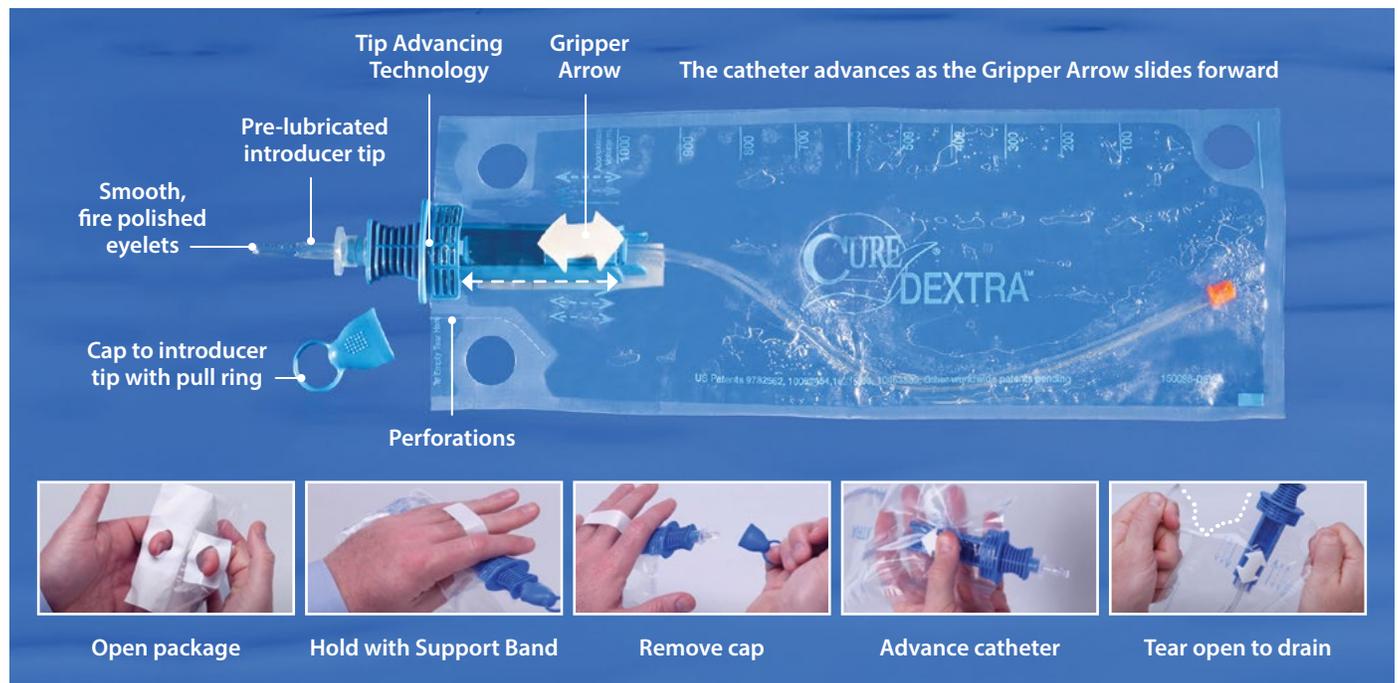

INNOVATIVE CATH-IN-A-BAG

Request free samples • www.curemedical-dextra.com • 800.422.8811

Cure Dextra® Closed System

The sterile, single-use Cure Dextra is an innovative closed system catheter featuring smooth, fire polished eyelets on a pre-lubricated catheter integrated with a 1000 ml collection bag. It enables 'No Touch' use which helps reduce the risk of exposure to bacteria that can lead to infection. Proprietary product features are designed to help make the Cure Dextra easy to use – even for individuals with limited hand dexterity.

- Reinforced finger loops on the package help enable easy opening.
- A Support Band on the back of the collection bag helps enable controlled use.
- The Pull Ring helps enable easy removal of the cap on the pre-lubricated introducer tip.
- Tip Advancing Technology with Gripper Arrow helps facilitate ease of use. The catheter advances into the body with each full forward stroke. It does not retract into the bag on the backstroke.
- Perforations in the collection bag help create an opening for easy draining.

Cure Ultra® and Cure Ultra® Plus™

The sterile, single-use Cure Ultra line of pre-lubricated, ready-to-use catheters has expanded to include an 8" length for women – the Cure Ultra Plus. This conveniently portable product family offers many beneficial features:

- Smooth, fire polished eyelets are designed for comfort and to help reduce irritation that can lead to infection.
- The flexible, attractive packaging and kink-resistant catheter help enable discreet portability – even in small spaces.
- The unique, ergonomic funnel shape offers a ‘No Roll’ benefit and helps enable controlled handling.
- To help ensure comfortable use, a CoverAll™ feature provides even distribution of gel lubricant over the catheter as it is removed from the package – for ready-to-use convenience.
- Use of minimum product and packaging material means less waste and a more eco-conscious choice compared to many other options.

Cure Twist®

The small, attractive Cure Twist is similar to the design of a cosmetic item – so it is an ideal choice for women who value portability and discretion. It features an easy, twist open top and smooth, fire polished eyelets on a straight tip. After use, the Cure Twist catheter can go back into the container for clean, secure, and discreet disposal.

The Cure Twist offers ready-to-use convenience and discreet portability. Water soluble gel helps enable comfortable use with a 'No Drip/No Mess' benefit. If needed, the universal funnel can easily connect to standard drainage options.

HYDROPHILIC CATHETERS

Request free samples • www.curemedical.com • 800.422.8811

Hydrophilic Cure Catheter®

The sterile, single-use, Hydrophilic Cure Catheter features smooth, fire polished eyelets for comfort. It has a smooth, slippery surface when wet. It is easy to hydrate the Hydrophilic Cure Catheter in the package:

- Compress the water packet to release purified water into the sealed catheter package.
- Open the package just enough to be able to reach the catheter funnel. For convenience, the package can be temporarily adhered to a vertical surface to keep the purified water contained within the package.
