			22-33	423559	Natura™ POKit Invisi 45mm CMT 1X5	

The right barrier and pouching solutions help support a healthy bond

The most common ostomy self-care challenges are related to leakage, skin issues, frequency of pouch changes and difficulty caring for an ostomy.¹ Our post-operative kit options have been simplified to include only our best technologies, improving patient outcomes and generating less waste.

Convatec Durahesive®

All barriers use Durahesive®, featuring initial tack, strong adhesion and extended wear time.

30% of patients exhibit peristomal skin complications within 90 days of surgery.¹

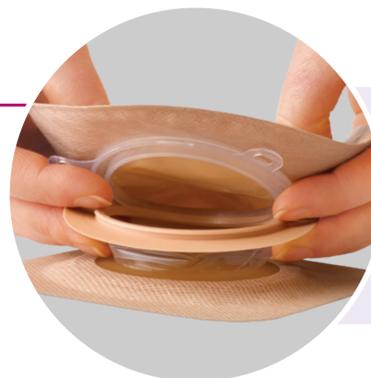

95% of people who started on Convatec Moldable Technology™ kept their skin healthy²

Convatec Moldable Technology™ Skin Barrier

Patented Rebounding Memory Technology™ - Customizable so that it molds to the stoma for a perfect fit every time

Accordion

Our Accordion flange is a post-operative option designed to prevent pressure or trauma. The accordion flange lifts up to provide generous finger room to make coupling easier and more comfortable.

2x the lifting height of any other lifting flange in the market³

Created utilizing feedback from **1,000 WOC Nurses⁴** and **400 patients⁵**

*Only for drainable pouches

Pouches

Convatec pouches are designed for comfort, ease and security.

InvisiClose™ Clipless Tail Closure*: intuitive, easy to open without compromising security

Wider Outlet*: enables easier drainage

Accuseal™ Tap: a faucet type tap designed for easy manipulation and emptying

TRANSITION GUIDE

Use the chart below to note the changes in our new, simplified Post-Operative Kits. All kits include 5 packs per box.

DRAINABLE

Natura™ Drainable **Cut-to-Fit**

Previous SKU	New SKU	Change to Durahesive®	Larger Cut Range (cuts to 45mm)	No Loop Rod	No Low Pressure Adapter
