

NATURA[®]

MOLDABLE SKIN BARRIERS
WITH ACCORDION FLANGE

1 Moldable Skin Barrier Application

Measure the stoma and select the appropriate size skin barrier. There is a clear release liner on back of skin barrier: do not remove yet.

For a custom fit roll and shape the disc to the size of your stoma.
Do not stretch, pull or cut.

Peel off clear release liner and centre the opening over the stoma. Apply to clean dry skin.

Remove white release paper. Press the skin barrier into place and if necessary re-adjust the rolled adhesive to create a snug fit. Smooth and hold the skin barrier in place for 30 seconds.

2 Applying and wearing the pouch

Separate the sides of the pouch to allow some air to enter.

PULL UP Accordion Flange and hold with thumbs on top and fingers underneath. Align flanges of pouch and skin barrier.

Start at the bottom and apply pressure around the flanges until they snap together. Then place the Accordion Flange in the **DOWN** position for a flat profile.

3

Closing the pouch

Fold the end up towards you until the interlocking closures line up.

Press and pinch around the closure to secure.

Turn the Lock-it-Pocket™ inside-out to tuck tail inside.

4

Emptying and cleaning the pouch

To empty pouch, tilt the tail up towards your body. Peel open the closure and unravel tail. Unlock pouch closure and open the tail by pushing in both ends of the outlet end-strips with fingers; drain pouch.

Tips for cleaning the pouch: Support the pouch with one hand and wipe tail of pouch in firm downward motion with toilet tissue in other hand.

Clean in the inside surface of tail with toilet tissue or baby wipe.

5

Removing the pouch

To remove the pouch from the flange, hold the flange down with one hand and gently un-snap the pouch.

Gently pull the skin barrier down, away from the skin. While supporting the adjacent skin with your other hand.
