

We listen to your clinical needs

For inspired improvements
in fecal management

Sampling port

- Provides access to the catheter for safe and easy stool collection
- Designed to help decrease risk of exposure to infectious stool

Medication delivery

- Equipped to deliver prescribed medication rectally via the irrigation port
- Simple delivery process without complicating the use of the device

Extended catheter

- Adapts to a range of bed sizes
- Accommodates a variety of patient heights and weights

Adhesive labels

- 5 adhesive labels with date printing format, available in kit pack

Featuring the unique SIGNAL® indicator

- Aids in assuring a comfortable and customized seal
- Indicates maximum fill capacity of soft retention balloon, at any volume ≤ 45 mL, based on size of the rectal vault*

*Maximum fill volume is ≤ 45 mL. Signal indicator could pop before 45 mL if the rectal space is smaller than maximum balloon size. Filling should stop when the indicator pops out and stays out. Never add more than 45 mL total.

FlexiSeal[®] SIGNAL[®]

Flexi-Seal® FMS
