For non-ambulatory patients who are incontinent of loose or semi-formed stool.

Flexi-Seal® Faecal Collector features a skin-friendly hydrocolloid adhesive with a tape border, plus a tapered pouch with a drainage port and deodorising filter.

Problems With Pads
• No odour containment
• Frequent changing, moving, and disturbing patients
• Need skin care products to protect skin
• Risk of skin erythema, maceration, and breakdown
• Extensive cleaning of patients

Advantages of Faecal Collection
Helps protect skin integrity—Averts breakdown/maceration of perianal skin
• Helps minimise exposure to faeces
• Facilitates measurement of output
• Maintains patient comfort and care
• May remain in place up to 48 hours
• Can hold up to 1 Litre of liquid/semi-formed stool
To benefit the patient, the staff, and the hospital environment

- Easy to prepare — apply with minimal equipment: soft cloth for cleansing, skin cleanser, gloves, and scissors
- Designed to offer security and skin protection
- Equipped with a tap for use with a bedside drain unit for liquid stool, or a tail closure for semi-formed stool
- Does not contain latex
