of consumers use a convex product long term<sup>3</sup>

Only ConvaTec offers convex products in cut-to-fit, pre-cut and moldable technology

# WE CAN

Help People Feel More Secure

## ease™ Strips

ease™ strips help keep your skin barrier in place.

### 5 Easy Reasons to Use ease Strips

**Secure** - Helps keep your skin barrier in place

**Flexible and thin** - Designed to move with you

**Skin friendly** - Latex free

**Easy application** - Curved to be used with any ostomy system

**Water resistant** - Designed to be used for both swimming and bathing

# Application Tips

ease™ Strips can help with a more secure feeling.  
Follow these tips for the best results.

## Step 1 Preparation

Begin application by warming the strip briefly between your hands to aid adhesion. Clean the skin where the strip will be placed with lukewarm water. Pat skin dry.

## Step 2 Application

Remove half of the backing paper and apply the strip to the skin, overlapping the edge of the barrier. The strip should overlap the edges of the skin barrier at least half an inch.

Remove the remaining backing and smooth down for 30 seconds to aid in adhesion.

## Step 3 Removal

Support the skin with your hand and gently remove the strip with your other hand by peeling horizontally until removed from the skin. An adhesive remover may be used to assist.

Code	Description / Dimensions	Qty
 422163	ease™ Thin curve   3cm x 9cm (1 <sup>1</sup> / <sub>5</sub> in x 3 <sup>1</sup> / <sub>2</sub> in)	80 pcs
