

DuoDERM[®] *Extra Thin*

Designed to support wound repair and to protect skin...
here, there, everywhere!

DuoDERM[®] Extra Thin dressing is designed to cover and protect susceptible areas

- Can be used anywhere on the body to gently protect newly-formed tissue or skin at risk of breakdown
- Designed to reduce cost of care

Supports moist wound healing

- Provides a moist wound healing environment that supports epithelialization¹
- May be used on skin tears, superficial wounds, dry-to-lightly exuding dermal ulcers, and postoperative wounds

DuoDERM[®]

Extra Thin

DuoDERM[®] Extra Thin dressings offer so many product benefits... whether you want to support wound repair or to protect skin.

Designed for patient comfort

- Translucent backing is designed to prevent needless dressing changes that can cause discomfort and disturb healing
- Thin design is flexible and conformable
- Designed to promote a moist wound environment, which supports healing and prevents damage to new epithelium upon removal
- Moisture-resistant for ease of cleaning/showering

Incredibly versatile

- Can be used as a primary or secondary dressing
- Available in a wide variety of sizes and shapes—including oval, square, and rectangle
- Can be cut to shape

Creates a moist wound healing environment

- DuoDERM is the only hydrocolloid dressing with both a Triple Hydrocolloid Matrix[®] and a viral/bacterial barrier^{*2-4}

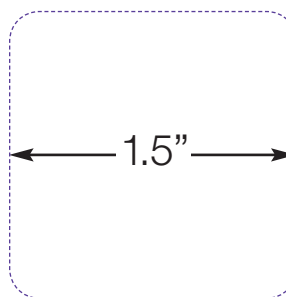

Helps to reduce cost of care for caregiver

- Preventing breakdown may spare cost of treating wounds that may have developed
- Long wear time means fewer dressings required
- DuoDERM Extra Thin dressing is a low-cost hydrocolloid
