

Experience the difference™

GentleCath™ Intermittent Catheters
Helping to make the transition back
to everyday life simple and safe.

Experience the difference

As patients transition from your care back to their everyday lives, we want them to feel ready, empowered and as independent as possible. **GentleCath™** intermittent catheters will be with them on their journey through life re-establishing their confidence and allowing them to achieve their goals with use of a safe product.

Making a difference for over 30 years

An experienced leader in continence care, ConvaTec has made it a priority to listen to the needs of patients and the insights of caregivers. This is embodied in the products we design and the services we offer. **GentleCath™** is our newest offering designed for patient safety and success.

Feel the difference!

GentleCath™ is designed to make catheter insertion and removal as smooth and easy as possible for the patient.

- Polished and rounded eyelets minimize friction.
- Soft, rounded tip aids smooth insertion.
- Available in male and female straight tip and male coude tip, for insertion through complicated passages.

See the difference!

- Color coded connector for easy FR size identification.
- Available in a wide range of sizes to meet your patients' needs.
- Fits drainage bags or other devices.

Live the difference

Throughout the continuum of care, from the hospital through rehabilitation to when your patient arrives home, ConvaTec is right there with support and information to help them get back to living their lives.

The **ConvaTec** Interaction Center

- A dedicated team of registered WOC Nurses are available to support you – and your patients.
- Once patients are home they may have a product question, an insertion issue, or need help finding a support group. The impact of hearing a live voice (not a recording) on the line is so important!

Medicare: At-a-Glance*

Per the Medicare guidelines on Intermittent Urinary Catheterization, any patient who utilizes intermittent catheters can receive one sterile urological catheter and one packet of lubricant for each catheterization.

- Physician prescriptions should reflect the actual number of times a patient catheterizes per day.
- Medicare will cover up to a maximum of 200 intermittent catheters per month with the following codes:
 - **A4351:** Intermittent urinary catheter with straight tip, with or without coating
 - **A4352:** Intermittent urinary catheter with Coudé/Tiemann tip, with or without coating

When a coudé tip catheter (A4352) is used there must be documentation in your medical record of the medical necessity for that catheter rather than a straight tip catheter.

Ordering Information

| Material Description | French Size | Quantity per Unit | SKU | HCPCS |
|---|-------------|-------------------|--------|-------|
