

Product Description

Exudate Management – For moderately to heavily exuding malodorous wounds

CarboFLEX® dressing is a five-layer dressing specifically designed to address the management problems associated with malodorous wounds.

CarboFLEX® dressing provides effective exudate control and odour adsorption while being soft and conformable^{1,2}.

Application*

Carefully cleanse the wound with saline and dry surrounding skin. Choose a dressing size that is large enough to overlap the wound edge by at least 3cm. For shallow wounds, CarboFLEX® dressing can be used as a primary dressing. For deeper wounds, CarboFLEX® dressing may be used as a secondary dressing over a suitable cavity filler.

Place the fibrous (non-shiny) surface of the dressing directly onto the wound or over the cavity filler. The absorbent wound contact layer will form a soft gel when in contact with wound exudate. For wounds with very heavy levels of exudate, use an appropriate absorptive dressing such as AQUACEL® dressing as a primary dressing (either ribbon for cavities or a sheet for shallow wounds) and CarboFLEX® dressing as a secondary dressing.

CarboFLEX® dressing can be secured in place with tape or other appropriate material.

*Please refer to pack insert for full instructions, prior to use.

Specifications

Size	Dressings Per Box	Product Code	NHS Code	PIP Code
10 cm x 10 cm	10	S7660	ELV022	252-7364
8 cm x 15 cm	5	S7661	ELV021	252-7372

Clinical Benefits

- Supports moist wound healing environment
- Effectively controls wound malodour¹
- Absorbs and controls exudate²
- Non-adherent allowing less traumatic dressing changes
- Soft and conformable
- Aesthetically pleasing to patients³
- May help relieve feelings of social isolation and restore lost confidence³

Indications

CarboFLEX® dressing is indicated for the management of malodorous wounds.

- Chronic wounds: leg ulcers, pressure ulcers, diabetic ulcers and fungating lesions
- Acute wounds: lacerations and post-surgical wounds

CarboFLEX® dressing may be used as a primary dressing for shallow wounds or with deeper wounds as a secondary dressing over a wound filler.
