# Our PRODUCTS

Our ostomy care products are designed to help give people the confidence to achieve the things they want in life – whether it’s going for a run, going out with friends or family, or going for a walk in the park.

Living with a stoma doesn’t have to hold anyone back from where they want to go and we’re here to help them get there.

# A guide to ADHESIVES

## STOMAHESIVE®

Stomahesive® technology is a hydrocolloid adhesive that gently adheres to the skin, protecting it from the damaging effects of stoma effluent. Stomahesive® technology combines adhesive and hydrocolloid components for optimal performance under various conditions. Stomahesive® technology is a unique product, only from ConvaTec.

Stomahesive® base plates are ideal for people whose stoma output is semi-formed to formed stool. This reliable base plate provides a special formula that enables the base plate to adhere to both dry and moist skin. It holds firmly to skin while helping to protect against irritating output. Another feature of the Stomahesive® base plates is an outer protective coating which helps keep it in place. Plus, Stomahesive® base plates are easy to fit, apply, and remove.

### Modified Stomahesive®

To further assist in the care of peristomal skin, ConvaTec have developed a modified Stomahesive® that allows a gentle adherence to the skin. Modified Stomahesive® base plates are more flexible and are easier to remove.

## DURAHESIVE®

Durahesive® skin base plates are designed for people whose stoma output is mostly liquid. Unlike some other skin base plates that can break down around liquid output, Durahesive® skin base plates swell up to protect the stoma.<sup>1</sup> This special effect, called turtle-necking, helps create a more secure seal without harming the skin. Durahesive® skin base plates are also easy to fit, apply, and remove. They will adhere securely to the skin while showering, bathing and swimming.

## TAPE COLLARS

*are available in two forms:*

**Acrylic:** Tape collar designed with good tack

**Hydrocolloid:** Designed for those with sensitivity to other tape collars

### Designed for patients

- with semi-formed/formed output
- who have sensitive intact skin
- with frequent changes
- who prefer a standard wear time

### Designed for patients

- with semi-liquid/liquid output, including urine
- who want or need longer wear time

# A guide to BASE PLATES

## CUT TO FIT

Cut-to-Fit base plates can be cut to match the shape and size of individual stomas. Using curved scissors, one can cut a circle, oval or any shape needed to fit the stoma.

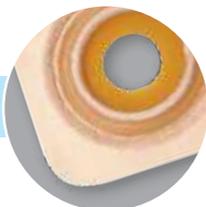

### Designed for patients

- with a stoma size in-between pre-cut sizes
- with an irregular stoma shape

## PRE-CUT

Pre-cut base plates have a uniform, circular stoma hole and are ready to apply right out of the box. They are available for the most common stoma sizes.

### Designed for patients

- with an evenly round stoma that fits the available pre-cut size
- with dexterity issues who find cutting challenging

## MOULDABLE

ConvaTec Moldable Technology™ skin barrier with Rebounding Memory Technology™ creates an elastic-like seal that rebounds to fit most shapes and sizes, and then “turtlenecks” upward, to enhance the seal and protect the skin.<sup>2</sup>

### Designed for patients

- who have large, round, oval or irregular shaped stomas
- with dexterity issues who find cutting challenging

### Look for this icon

Please note: Do not cut the base plates

# Common pouch FEATURES

## DRAINABLE POUCH CLOSURE

### **InvisiClose® Clipless Tail Closure**

Self closing drainable pouch closure which provides an easy closure option that does not require a separate clip for added security.

### **Lock-it Pocket®**

Folds inside out to hide away the secured drainage tail—providing the flexibility of a drainable pouch, with the feel and comfort of a closed-end pouch.

*Traditional drainable pouches are closed with a separate clip.*

## POUCH COLOUR

### **Transparent (Clear front of pouch)**

Clear pouch front for easy output assessment and determining when a pouch needs to be changed or emptied. Soft and quiet material on the body side of the pouch.

### **Opaque (Tan-coloured pouch)**

Soft and quiet material cover both the front and the body side of the pouch for more discretion and comfort.

### **Easy-View Window**

Some options come with an easy-view window for accurate positioning and observation.

## FILTER OR NO FILTER

Filters help release and deodorize gas and keep the closed or drainable pouch flat.

Note that the filter must be covered with a filter cover while swimming, bathing or showering.

# Urostomy POUCHES

## UROSTOMY POUCH DRAINAGE

The ConvaTec Accuseal™ Tap quickly and easily drains liquid output. Its swivel mechanism glides easily into open or closed positions whilst offering extra security with the red marker that indicates the tap is in the open position. A stopper adds extra security. Accuseal™ is designed for adaptors on night drainage bags.

*Other drainage options include a Soft Tap or Fold Over Tap.*

*All Urostomy pouches include an anti-reflux valve which is designed to help prevent backflow.*

## URINE DRAINAGE BAG CONNECTORS

Each box of urostomy pouches contains two plastic adaptors for attaching a urine/overnight drainage bag. Additional plastic adaptors are available upon request for in-hospital use.

Telephone ConvaTec Customer Care for information or to order.

## CONVEXITY VARIANT GUIDE

The Esteem<sup>®</sup>  portfolio offers a range of one-piece convex products with various depths to help provide comfort, freedom, security and reassurance to your patient, all designed for different stoma shapes and sizes.

Full assessment of the stoma and abdomen should be made when selecting convexity variant\*\*

### STOMA PROTRUSION

**Protruding:** use widest option available  
*Pressure distributed over a wider area around the stoma*

**Flush:** use narrowest option available  
*Assess the abdomen type and where pressure is required*

**Retracted:** use narrowest option available  
*Gives pressure closest to the stoma to help protrusion*

### ABDOMINAL TONE AND CONTOUR

**Skin folds/creases:** use widest option available  
*Help to move any skin folds out of the way*

**Rigid/rounded:** use widest option available  
*Pressure distributed over a wider area and can aid adhesion*

**Flaccid - Average tone:** use option most suitable to stoma protrusion

### PERISTOMAL SKIN

**Swollen/tender:** use widest option available to achieve desired protrusion  
*Pressure distributed over a wider area and can aid adhesion*

**Skin types:** use option most suitable to stoma protrusion and abdominal tone/contour

**Normal/healthy skin:** use option most suitable to stoma protrusion and abdominal tone/contour

\*Based on Convexity Plateau Variants Guidelines / Considerations selection guide AP-018355-MM.

\*\*Patients should be assessed by their Health Care Professional/Stoma Nurse for appropriate product choice and use of convexity.

# Introducing ESTEEM® Soft Convex

ONE PIECE

## ALL BODIES ARE DIFFERENT.

Esteem®  Soft Convex combines flexibility with a shallow convexity, and is designed to conform well to the body and be comfortable to wear.

- **Flexible Convexity:** conforms to the body and helps improve the pouch seal by minimising leaks
- **Easy-View Window:** for accurate positioning and observation
- **Filter:** designed to help minimise odours and ballooning\*
- **Safe Seal Clipless Closure:** designed to help make emptying and cleaning easy

**Designed to minimise pressure**

**Designed to be skin friendly**

**Flexible, conforms to body**

**Convex**

*\*Drainable options only.*

# ESTEEM® Flex Convex

**Esteem®  Flex Convex system combines the comfort and freedom of flexibility with the firmness of convexity.**

Flex Convex adheres into creases, skin folds, and onto flaccid abdomens<sup>3</sup>. Its increased flexibility provides more comfortable wear compared to more rigid forms of convexity<sup>4</sup>. As Flex Convex creates less pressure on the peristomal skin<sup>6</sup> it is less likely to cause skin damage<sup>5</sup>.

## Closed Pouches with Flexible Convexity

Hydrocolloid base plate with tapered edge, opaque, belt tabs, viewing window, with filter, (2 sided fabric)

Product Code	Stoma Size	Plateau Size	Description	Pack Size	SAS Code	Monthly Allowance

# NATURA®

ConvaTec developed these innovative pouches to be noticeably more comfortable and more discreet.

The Natura®<sup>+</sup> pouching system combined with ConvaTec advanced base plate adhesives offer security, comfort and discretion.

## Natura® Colour Key & Sizing Guide

Match the colour of the dot on the base plate box with the colour of the dot on the pouch box.

				
32 mm	38 mm	45 mm	57 mm	70 mm

# NATURA<sup>®</sup>

## Accordion Flange

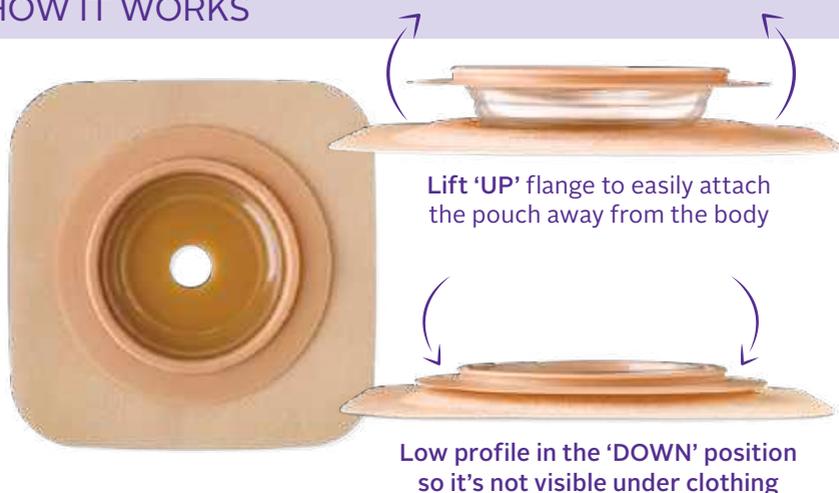

### FEATURES

- The accordion flange lifts to provide generous finger room so coupling is easy and comfortable.
- Accordion Flange<sup>®</sup> has a low profile in the 'DOWN' position so it's not visible under clothing. The base plate moves as the body flexes
- Available in flat cut to fit, Convex cut to fit and flat ConvaTec Mouldable Technology<sup>™</sup>
- Connects with an audible 'click' and physical 'snap' to confirm the pouch is firmly attached

### Designed for patients

- with dexterity issues as it provides finger room so coupling is easy and comfortable
- to prevent pressure or trauma if abdominal tenderness is present due to post-operative stoma surgery/ incisions

### HOW IT WORKS

## Base Plates with Firm Convexity and Accordion Flange®

Durahesive® base plate with flexible tape collar

# ESTEEM *synergy*®

Esteem *synergy*® utilises an innovative Adhesive Coupling Technology™ that connects the pouch to the base plate offering an alternative to mechanical coupling systems.

Esteem *synergy*® is a ConvaTec innovation that is a skin friendly and versatile two-piece system, the provides the low profile, comfort, and flexibility of a conventional one-piece system.

Esteem *synergy*® has a flat, flexible adhesive foam ring on the pouch that securely adheres to a clear, flat, flexible plastic “Landing Zone” flange on the base plate.

## Esteem *synergy*® Colour Key & Sizing Guide

Match the colour of the dot on the base plate box with the colour of the dot on the pouch box.

# SKIN Care

Looking after peristomal skin is an essential part of stoma management. The ConvaTec Skincare range includes second generation technology in Niltac™ Adhesive Remover and Silesse™ Liquid Skin Barrier.

## Niltac™ Adhesive Remover

Niltac™ is a Sting Free, fast drying adhesive remover that does not require any extra cleansing prior to the application of the next device, tape or adhesive dressing.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
420788	TR102 Adhesive Remover Wipes	30 wipes	80006W	60
420787	TR101 Adhesive Remover Spray	50ml spray can	80005T	2
420798	TR1015 Adhesive Remover Spray – Sterile	150ml spray can	N/A	N/A

## ConvaCare® Adhesive Remover

ConvaCare® Adhesive Remover Contains coconut oil and lemon essence which effectively removes adhesive residue and assists in the easy removal of adhesive devices, tapes and dressings. ConvaCare® moisturises the skin and does not contain alcohol. Skin must be thoroughly washed with water and dried before next device, tape or dressing application.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
37443	ConvaCare® Adhesive Remover Wipes	100	3522J	60

## Silesse™ Sting Free Barrier Wipe and Spray

Silesse™ provides a flexible, breathable skin barrier that protects the skin from chemical and mechanical damage commonly caused by adhesives and/or corrosive body fluids.

Product Code		Pack Size	SAS Code	Monthly Allowance
420789	TR103 Sting Free Barrier Wipe	30	N/A	N/A
420790	TR104 Sting Free Barrier Spray	50ml spray can	80009B	6 Annually
420797	TR109 Sting Free Barrier Spray	28ml pump spray	80031E	1
420793	TR107-5 Sting Free Barrier Foam Applicator 1ml	5	N/A	N/A
420795	TR108-5 Sting Free Barrier Foam Applicator 3ml	5	N/A	N/A

## ConvaCare® Protective Barrier Wipe

ConvaCare® Protective Barrier Wipe is a non-water soluble skin barrier that forms a thin protective film on the skin which allows better adhesion of adhesive devices, tapes and dressings. ConvaCare® protective barrier formula is designed not to peel or chip. Contains alcohol.

Product Code		Pack Size	SAS Code	Monthly Allowance
37444	ConvaCare® Barrier Wipes	100	3502H	700 Annually

## Diamonds™ Super Absorbent Gelling Sachets

Diamonds™ contains ActiveOne™, a unique odour control formula intended for patients with loose stool to use every day.

These super absorbent gelling sachets also provide discretion for Ileostomy patients looking to reduce noise and control the profile of their pouch by being able to manipulate the pouch contents into a flattened shape. Gelling output with Diamonds™ also reduces the possibility of back-flow around the edge of the base plate.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
420791	Diamonds™ Gelling and Odour Control Sachets	100 Sachets/jar	80103Y	7 per year with an authority

## ease™ Strips

Thin flexible strips designed to adapt to your body and move with you.

ease™ strips overlap the edge of the skin barrier for extra security. The corner or edge of the wafer could lose stickiness, when worn for long periods. The strips help maintain the contact with the skin.

They can also be used to prevent the edge of the wafer sticking to clothing after swimming or bathing.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
422160	ease™ Thin strips 3cm x 11 cm	60	80188K	60
422164	ease™ Thin curve 3cm x 9 cm	60	80188K	60

## Stomahesive® Seal

ConvaTec Stomahesive® Seal is a mouldable, moisture absorbing skin barrier designed to protect peristomal skin from effluent. Designed to aid the adherence of a pouch/dressing to the skin around the stoma, Stomahesive® seals are suitable for patients with an ileostomy, urostomy or colostomy.

The seals are single use devices and should be replaced on application of each new ostomy device or dressing.

Product	Description for Use
48mm (Thin)	Ideal skin protection from leakage for all types, shapes and sizes of stoma.
48mm (Standard)	Thicker seal, ideal for extra skin protection from significant leakage problems.
98mm (Large)	Large seal designed to cover a greater area around the stoma for added skin protection from leakage.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
413503	48mm Standard	10	80008Y	30
413504	48mm Thin	10	80008Y	30
413505	98mm Large	10	80008Y	30

## Full Stomahesive® Skin Barrier

Used to protect peristomal skin, Stomahesive® Skin Barrier can be cut and moulded for use in difficult to manage stomas, provide a base for tape to adhere to and can also be used to 'window frame' large wounds.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
21712	10 x 10cm	5	3532X	30
21715	20 x 20cm	3	3580K	30

## Stomahesive® Protective Powder

Protective barrier against excoriating discharge on weeping areas. Increases wear time by absorbing moisture helping to prevent skin irritation.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
25510	28gm Bottle	1	3511T	2

## Stomahesive® Paste

Used as a 'crease or gap filler' Stomahesive Protective Paste® provides a flat pouching surface with the aim of preventing leakage under the base plate.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
183910	57gm Tube	1	3503J	3

## Orabase® Protective Paste

To protect and soothe the minor irritations of the skin.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
149710	Protective Paste 5gm	1	N/A	N/A
149715	Protective Paste 15gm	1	3787H	2

## Belt

For use with convex appliances to assist in improving protrusion of flush/retracted stomas. ConvaTec Ostomy Belts are also designed to assist in providing Ostomates with extra security.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
175507	White Belt, up to 106cm	1	3792N	4 per year

## Clips

For use with drainable appliances.

Product Code	Description	Pack Size	SAS Code	Monthly Allowance
175635	Straight Clip	10	3760X	1 Box 10 Clips per year
