ConvaTec

ConvaTec

Customer Relations Center:

What is it?

The Customer Relations Center (CRC) is ConvaTec's living communication hub of ostomy, wound and skin care as well as continence and critical care expertise.

For healthcare professionals:

- Clinical information and technical data on our products
- New product information
- Samples for your patients
- Patient literature on ostomy, wound and skin care, continence and critical care
- Advanced wound care expertise

For retailers:

- Technical assistance & product questions
- Samples for your customers
- Contact with Territory Managers

For people living with an ostomy:

- Free product samples
- Helpful literature
- Expert advice on how to care for their stoma

The CRC team:

Note: In order to avoid misunderstanding and to protect the interest of our customers, we respectfully request careful reading of the "Terms and Conditions of Sale", as outlined. Non-compliance with these terms may result in suspension of your account.

TERMS AND CONDITIONS OF SALE

PRICES AND TERMS OF SALE

Prices and terms listed herein supersede those set forth on all previous price lists and all contracts and agreements that are expired. Due to market fluctuation, prices shown are subject to change without notice. ***RESTRICTION OF PURCHASE & SALES:*** Purchase of ConvaTec products must be done through the Canadian order desk at 1-866-987-1471 or indirectly through a distributor who purchases ***directly from ConvaTec Canada***. These products are ***not for distribution or resale outside of Canada*** or to anyone who - to the customers' knowledge - is susceptible to this practice.

PAYMENT TERMS

TERMS ARE NET 30 DAYS FROM DATE OF INVOICE.
Electronic Fund Transfers (EFT) are possible, please contact the Order Desk.

CHANGES IN PRICES

In all cases, merchandise will be invoiced at prices in effect on the date the order is received. Any pricing discrepancy MUST be reported within 60 days.

MINIMUM SHIPMENTS AND TRANSPORTATION COSTS

All orders amounting to a minimum of $250 before tax for retail accounts and for health care facilities will be shipped prepaid via seller's choice of carrier. Any orders of value less than the required minimum will be subject to a $50 service charge. Extra shipping costs incurred because of special services requested by a customer will be added to the invoice.

SHIPMENTS

Title to merchandise passes to the customer upon delivery of the goods to the customer.

SHORTAGE, DAMAGE OR LOSS IN SHIPMENT

Merchandise released for shipment leaves the depot in good order. Claims for damage, defacement or loss occurring in transit should be filed promptly with the transportation company. Customers should contact the Order Desk for processing of such claims and in supplying proof of delivery, providing these requests are received within 21 DAYS following the date of shipment. ANY COSTS INCURRED WILL BE PASSED ALONG TO THE CUSTOMER IF PROOF OF DELIVERY IS ESTABLISHED.

RETURNED GOODS POLICY

All returns **MUST** have written authorization from the Order Desk (telephone: 1-866-987-1471). This authorization will be confirmed by the representative and the credit will only be issued after inspection of the returned goods by ConvaTec. **RETURNED GOODS WILL BE CREDITED AT ZERO IF NOT ACCOMPANIED BY A RETURN AUTHORIZATION NUMBER OR DOCUMENT.** Order desk may ask for copy of purchase order for compliance purposes.

- All merchandise returned for credit must be prepaid and received in the original unopened containers. Partially full containers, those from which the seal, carton or label have been defaced or removed, will not be credited under any circumstances. Goods for return should be packaged carefully before sending to ConvaTec; products and containers received with any signs of damage will not be credited. **ConvaTec will not ship back products that have been sent to us, as such, please ensure you respect the terms and conditions before sending products to ConvaTec.**
- Products shipped in error by ConvaTec Canada will be fully credited if returned within 21 days of invoice, freight collect.
- Products ordered in error will be fully credited **if returned within 21 days of invoice, freight prepaid**.
- There will be a restocking service charge equal to 15% of the invoice price or the lowest price indicated for that product in the current price list.
- All returned goods must have been purchased in the last 12 months.
- All returned goods must have at least 6 months of shelf life remaining.
- All returned goods must be received by ConvaTec within 21 days after the written authorization was issued.
- Products that have been deleted from the line for a period of 6 months or more after date of deletion notification from ConvaTec, including special offers, will not be accepted for credit or exchange.
- Merchandise that has been involved in a fire, flood, sacrifice or bankruptcy sale or returned by other than original purchaser will not be accepted for credit or exchange.

CONSUMER SATISFACTION

We are quality driven and we want the consumers to be completely satisfied with our products. In the event of a product complaint from a consumer, the retailer should refer this consumer to the ConvaTec Customer Relations Center at 1-800-465-6302.

TAXES

Provincial sales tax and/or GST, HST, QST will be charged, if applicable.

THE ABOVE TERMS CANNOT BE MODIFIED BY OUR REPRESENTATIVES.

Natura® Low-Pressure Adaptor

The Natura® Low-Pressure Adaptor converts the Natura® ostomy system into a low-pressure solution post-surgery. The product is an insert between the Natura® pouch and skin barrier to create enough clearance for a nurse to insert fingers and snap the pouch coupling ring into place without applying force directly to the patient's abdomen, which may cause pain or otherwise harm the post-op area.

Use of the Natura® Low-Pressure Adaptor can be discontinued when abdominal tenderness subsides. The pouch and skin barrier will connect together without using the Natura® Low-Pressure Adaptor.

The Natura® Low-Pressure Adaptor fits with the Natura® skin barrier and pouch 45 mm, 57 mm, 70 mm and 100 mm coupling sizes. It is a disposable one time use product to be changed with each skin barrier change.

TIP!

Ensure that the flange ring sizes of the Natura® skin barrier, Adaptor and Pouch are the same.

Reminder

Make sure to attach the Adaptor to the skin barrier before applying it to the skin.

404013	41 mm (1⅝")	35 mm (1⅜")

Box of 5 convex inserts . . . . . .

** Natura® inserts should only be used with Natura® Skin Barriers.*

Natura® Stomahesive® Skin Barrier
(with low profile flange)

Stomahesive® Skin Barriers are ideal for people whose stoma output is semi-formed to formed stool. This reliable skin barrier with low-profile flange provides excellent security because of a unique formula that enables the skin barrier to adhere to both dry and moist skin. The outer protective coating helps keep the skin barrier in place to provide added security when showering, bathing or swimming. Natura® Stomahesive® Skin Barriers are specifically designed for use with Natura® pouches.

Did you know?

1972: The Stomahesive® Skin Barrier was the 1st advanced skin barrier to improve ostomy care.

Natura® Stomahesive® Flexible Skin Barrier
(with low profile flange and white collar), Cut-to-Fit

Natura® Flexible Skin Barriers with flange and tape collar have rounded edges for a more comfortable fit, low-profile flange and split release paper backing for easy application.

Box of 10 skin barriers . . . . . .

Did you know?

If the product description of a skin barrier contains the word "flexible", it means the skin barrier has a tape edge.

Durahesive® Skin Barrier maintains an effective protective seal longer than conventional skin barriers. A "turtlenecking" effect helps to prevent leakage around the stoma and skin breakdown, for increased patient comfort and wear time. This solid, flexible or convex skin barrier, with tan or white collar, is designed with a low-profile flange for wearing comfort.

Did you know?

The solid Durahesive® Skin Barrier is more flexible than the solid Stomahesive® Skin Barrier.

Natura® Durahesive® Flexible Skin Barrier with Convex-It® (with low profile flange and white collar), Pre-Cut

The Durahesive® Flexible Skin Barrier with Convex-It® maintains an effective protective seal longer than conventional skin barriers. It provides deep convexity for extra security for retracted or difficult-to-manage stomas. A turtlenecking effect helps to prevent leakage around the stoma and skin breakdown, for increased patient comfort and wear-time.

11.5 cm x 11.5 cm (approx. 4” x 4”)

Natura® Skin Barrier with ConvaTec Moldable Technology™

The Natura® Moldable skin barriers allow the stoma opening to be molded to the shape and size of the stoma without the need for scissors.

Natura® Skin Barrier with ConvaTec Moldable Technology™ with white Hydrocolloid Collar Adhesive (HC) or white Acrylic Collar Adhesive (AC)

The Natura® skin barrier with ConvaTec Moldable Technology™ provides a worry-free fit because the molded adhesive with Rebounding Memory Technology™ gently hugs individual stoma contours, creating a secure, personalized fit. The Durahesive® technology top-side layer swells or "turtlenecks" up the stoma improving fit and providing a gapless seal.

Natura® Skin Barriers with ACCORDION flange

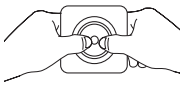

The Accordion flange makes pouch application much easier and more comfortable - The pressure is off! With ample room for coupling, it's ideal for tender post-op abdomens. In the "down" position, it is low profile, extremely flexible and conforms to body contours. Compatible with our state-of-the-art pouches.

Natura® Durahesive® Moldable Skin Barrier with ACCORDION Flange, Hydrocolloid Collar Adhesive (HC), tan

Durahesive® Skin Barrier maintains an effective protective seal longer than conventional skin barriers.

Esteem *synergy*® Two-Piece Ostomy System

Skin Barrier - To - Pouch Cross Reference

The table below shows the stoma sizes that each barrier can accommodate and shows the pouch collar diameter to be used with that skin barrier.

Flat Skin Barriers

Size	Label Colour	Reference Number to Ensure Proper Sizing	Maximum Stoma Size
Small	Blue	35	35 mm (1⅜")
Medium	Green	48	48 mm (1⅞")
Large	Yellow	61	61 mm (2 ⅜")
Extra Large	Peach	89	89 mm (3½")

Durahesive® Moldable Convex Flexible Skin Barrier

Size	Label Colour	Reference Number to Ensure Proper Sizing	Maximum Stoma Size
Small	Blue	35	22 mm (⅞")
Medium	Green	48	33 mm (1¼")
Large	Yellow	61	45 mm (1¾")

Pouches

Size	Label Colour	Reference Number to Ensure Proper Sizing	Pouch Collar Diameter
Small	Blue	35	35 mm (1⅜")
Medium	Green	48	48 mm (1⅞")
Large	Yellow	61	61 mm (2 ⅜")
Extra Large	Peach	89	89 mm (3½")

Esteem *synergy*® Skin Barrier with Transparent Landing Zone

The Esteem *synergy*® ostomy system utilizes an Adhesive Coupling Technology™ that connects the pouch to the skin barrier and eliminates the need for flange rings that have to be snapped or locked together. Esteem *synergy*® ostomy system combines the benefits of one and two-piece systems. The clear, flat, flexible plastic "Landing Zone" on the skin barrier is square and is slightly larger in size compared to the round adhesive ring on the pouch. This makes the application process easy – precise alignment is unnecessary.

Esteem *synergy*® Stomahesive® Flexible Skin Barrier (White Collar), Cut-to-Fit

405456 – **Small**, for stomas up to 35 mm (1⅜")
405457 – **Medium**, for stomas up to 48 mm (1⅞")

Box of 10 skin barriers . . . . . .

Esteem *synergy*® Durahesive® Convex Flexible Skin Barrier with ConvaTec Moldable Technology™, white acrylic tape collar

This innovative mold-to-fit convex skin barrier easily shapes to create a customized stoma opening to conform to irregularly-shaped stomas. It provides moderate to deep convexity and hugs the base of the stoma for optimum security and support. It eliminates the need for scissors and is perfect for people living with an ostomy who have dexterity and/or vision problems.

409268 – Small

MOLDABLE CONVEXITY

Esteem *synergy*® Drainable Pouch with Filter (with Cotton-Like Comfort Panel)

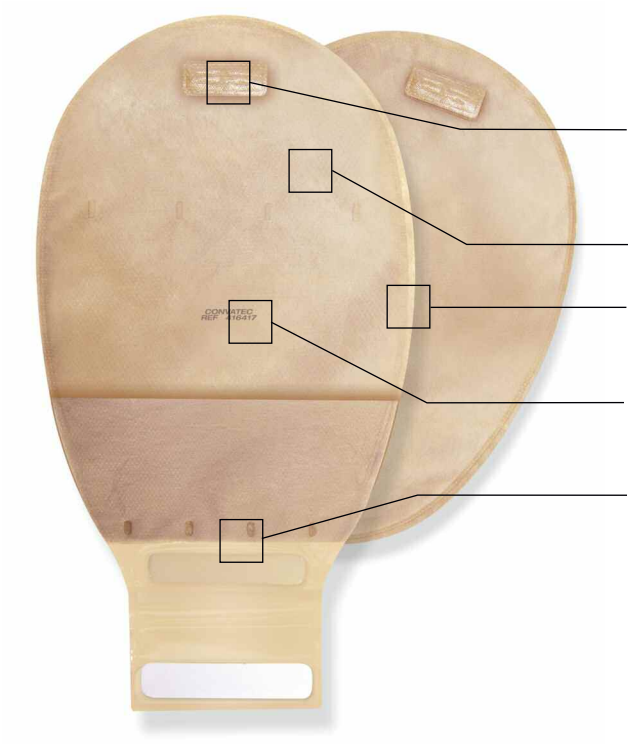

Combines the benefits of one and two-piece systems. Esteem *synergy*® drainable pouches offer the patient simplicity, discretion and comfort. For added security, the transparent landing zone helps determine when the pouch should be changed. Easy alignment allows for a consistently secure seal. The pouches feature an advanced filter system designed to absorb and neutralize a broad range of odor-causing agents. A durable soft-touch cotton-like backing is designed to dry easily after showering and be comfortable to wear throughout the day. The Esteem *synergy*® pouch is easy to apply and easy to remove.

Esteem *synergy*® Straight Drainable Pouch, with Filter

Esteem *synergy*® combines the low profile, comfort and flexibility of a one-piece system with the lifestyle versatility and skin friendliness of a two-piece system.

Extra Large, 35.5 cm (14"), Transparent, with Filter
405406 – Straight - 89 mm (3½")
Box of 10 pouches (10 straight tail closures per box) . . . . . .

Esteem *synergy*® Features:

Smart Filter
- Reduces clogging allowing it to work longer, keeping the pouch flat – while substantially reducing odor. Filter Covers available.

Comfortable Material
- Soft and smooth Comfort Panel that resists water.

Streamlined Shape
- Innovative streamlined shape is rounded for added comfort and discretion.

Easy to Read Code
- Product code number is printed right on the pouch for quick identification.

Discreet Closure
- Lock-it pocket™ on InvisiClose® pouches hides away the flapping tail to provide the security and comfort of a closed-end pouch. Closure is even easier to use with less snaps and fewer steps.

Esteem *synergy*® Drainable pouches with InvisiClose® and Lock-It Pocket™

Esteem *synergy*® drainable pouches offer simplicity, discretion and comfort. The InvisiClose® clipless tail closure offers double security, ease of drainage, comfort and cleanliness. The easy-to-open outlet and widened tail design help control flow and reduce splashing. The locking mechanism is enhanced by a Lock-It Pocket™ that hides away the tail to provide the security and comfort of a closed-end pouch.

Esteem® One-piece System

Esteem® system with Stomahesive® Technology is a one-piece system which is secure, flexible and most of all, kind to the skin.

SECURITY through durable adhesion

A skin-friendly skin barrier based on Stomahesive® technology that adheres on first contact with the skin and can be safely and easily removed, helping damaged and irritated skin to recover.

COMFORT both in fitting and during wear through unique design and choice of material.

ConvaTec worked with nurses and patients when designing the Esteem® system using a computerized pouch design process. The ergonomic shape which contours with the body's natural shape makes Esteem® comfortable and discreet to wear.

Esteem® One-piece System

- **Easy** to tailor to the stoma
- Starter opening **for both round and oval** stomas
- Measuring options **up to 70mm**
- **Optimal choice** of material and design
- **Soft**, durable backing, rounded, flowing form

Esteem® Convex system

Offers all the benefits of one-piece Esteem® system even when convexity is required

- choice of sizes

No cutting is required on Esteem® Convex which is available in a wide range of pre-cut pouches. The rigid convex skin barrier, made from Durahesive® Technology, is designed to provide extended wear time.

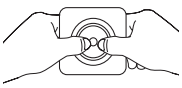

Esteem® Moldable One-piece System

The convenience of a one piece plus proven skin protection – it's the perfect combination. Elastic-like seal "rebounds" to fit the size and shape of stoma, providing a secure, snug fit. Just roll, mold and hold the adhesive to accommodate any stoma shape and size. No cutting, no stretching, no guesswork. Thin flexible design is made to move with your patients. The state-of-the-art pouch offers a soft comfort panel, easy-view window and the InvisiClose® clip-less tail closure with Lock-It Pocket™.

Esteem® Flex Convex

As the latest addition to our range of one-piece ostomy solutions, the Esteem® Flex Convex system combines the comfort and freedom of flexibility with the firmness of convexity.

Key benefits include:

- **Moves with you** – flexible convexity fits to body contours for comfort and easy positioning
- **Designed for skin health and security** – hydrocolloid skin barrier is made to stay firmly in place, helping to minimise leakage. Soft tapered edges also help resist snagging on clothing
- **Comfort and discretion** – soft quiet fabric
- **Trust and reassurance** – filter on closed and drainable options helps minimise odours and ballooning, while the anti-reflux valve on our urostomy pouches helps prevent back flow
- **Peace of mind** – split-fabric, easy-view window for accurate positioning and observation
- **Simple secure fastening** – the Safe Seal clipless closure on drainable options helps make cleaning and emptying easy
- **Support and security** – soft flexible belt loops available for added security

THREE PLATEAU SIZES

The Esteem® Flex Convex system is available in 3 plateau sizes to accommodate a range of stomas

Little Ones® One-Piece Ostomy System*

Little Ones® One-Piece Urostomy Pouch with Solid Stomahesive® Skin Barrier, Cut-to-Fit

The Little Ones® One-Piece ostomy system provides easy, one-step application and removal with a Bendable drainage Tap for easy emptying. An anti-reflux valve helps prevent urine from pooling at the base of the stoma which extends wear time.

Stoma opening can be enlarged to any shape up to 25 mm (1").

Transparent, approx. 15 cm (6")

20917 – For stoma sizes 8 mm to 25 mm (5/16" to 1")

Box of 15 pouches (2 night drainage adapters per box) . . . . . .

Little Ones® One-Piece Drainable Pouch with Solid Stomahesive® Skin Barrier, Cut-to-Fit

The skin barrier on the Little Ones® ostomy system provides similar skin protective qualities as those offered by Stomahesive®, but is modified to be more gentle. This skin barrier is thinner, more flexible and easy to remove, minimizing potential irritation to a young child's skin.

Stoma opening can be enlarged to any shape and size, up to 50 mm (2").

Transparent, approx. 15 cm (6")

20922 – For stoma sizes 8 mm to 50 mm (5/16" to 2")

Box of 15 pouches (16 individual tail closures per box) . . . . . .

Little Ones® One-Piece Drainable Pouch with InvisiClose® (Clipless) Tail Closure, Cut-to-Fit

To fit babies smaller than 4.5kg/10lbs

Trusted Stomahesive® technology assists in providing a safe, comfortable fit. This system offers an integrated cutting guide and no starter hole to allow for customization. The InvisiClose® outlet facilitates easy drainage, yet provides two levels of closure security you can trust.

Extra Small, approx. 11 cm (4"), Transparent, *1-sided* printed comfort panel

411633 – For stomas up to 23 mm (7/8")

Box of 10 pouches . . . . . .

** Little Ones® measuring guides are available in each box of skin barriers.*

Little Ones® Two-Piece Ostomy System*

Little Ones® Two-Piece Stomahesive® Flexible Skin Barrier (with Flange and White Collar), Cut-to-Fit

Smaller dimensions to fit a young child's body comfortably. Soft, pliable, adhesive collar applies easily, anchors securely, dries quickly after bathing. The Stomahesive® Skin Barrier offers excellent protection to the skin. The skin barrier's flexibility contours nicely to the child's body, allowing flexibility of movement.

Approx. 8 cm x 8 cm (3¼" x 3¼")

401925 – 32 mm (1¼")

Box of 5 skin barriers . . . . . .

Little Ones® Two-Piece Drainable Pouch

Two-piece system permits easy pouch removal and easy repositioning to ensure unobstructed draining even while the child is asleep. Wide-tail opening for faster, easier emptying.

Transparent, approx. 15 cm (6")

401927 – 32 mm (1¼")
401928 – 45 mm (1¾")

Box of 10 pouches (10 individual tail closures per box) . . . . . .

Natura® Flexible Skin Barrier **125259** *45 mm (1¾") can be used with Little Ones® pouch* **401928**.

Little Ones® Two-Piece Urostomy Pouch

The anti-reflux valve keeps urine from pooling at base of stoma. Secure drainage tap helps provide leakproof dependability. Pouch can be easily repositioned to allow for unobstructed drainage, even if the child is asleep. Drainage adapter provides easy attachment to night drainage container.

Transparent, approx. 13 cm (5")

401929 – 32 mm (1¼")

Box of 10 pouches (2 night drainage adapters per box) . . . . . .

Little Ones® Two-Piece Mini-Pouch

Designed for children and/or caregivers who require the convenience and security of a two-piece closed-end system. Eliminates the need for a tail clip and allows for disposal after one-time use.

Opaque, approx. 13 cm (5"), *1-sided* comfort panel

401930 – 32 mm (1¼")

Box of 20 mini-pouches . . . . . .

** Little Ones® measuring guides are available in each box of skin barriers.*

Adhesive Coupling Technology™ (ACT) Little Ones® Ostomy System*

Adhesive Coupling Technology™ lets you remove the pouch without removing the skin barrier. This makes pouch changing easy, is gentler on a baby's tender skin, and allows you to view the stoma without removing the skin barrier. The soft, colorful flocking and rounded corners of the pouch are comfortable on a baby's sensitive skin.

Adhesive Coupling Technology™ (ACT) Little Ones® Stomahesive® Solid Skin Barrier

The thin, flexible Stomahesive® skin barrier moves with the baby's belly, minimizing discomfort.

Standard, 8.5 cm x 8.5 cm (3⅜" x 3⅜")

411641 – For stomas size 4.8 mm to 31 mm (3/16" to 1¼")

Box of 5 skin barriers . . . . . .

Adhesive Coupling Technology™ (ACT) Little Ones® Stomahesive® Flexible Skin Barrier with Hydrocolloid Collar Adhesive (HC)

The thin, flexible Stomahesive® skin barrier moves with the baby's belly, minimizing discomfort. The hydrocolloid flexible fabric collar provides an extra level of security and improves flexibility and comfort by gently adhering to sensitive peristomal skin.

Standard, 8.5 cm x 8.5 cm (3⅜" x 3⅜")

411642 – For stomas size 4.8 mm to 31 mm (3/16" to 1¼")

Box of 5 skin barriers . . . . . .

Adhesive Coupling Technology™ (ACT) Little Ones® Closed-End Pouch with Filter

Standard, approx. 15 cm (6"), Opaque, *2-sided* printed comfort panel

411639 – For stomas size 4.8 mm to 31 mm (3/16" to 1¼")

Box of 10 pouches . . . . . .

Standard, approx. 15 cm (6"), Transparent, *1-sided* printed comfort panel

411640 – For stomas size 4.8 mm to 31 mm (3/16" to 1¼")

Box of 10 pouches . . . . . .

Adhesive Coupling Technology™ (ACT) Little Ones® Drainable Pouch with Filter and InvisiClose® (Clipless) Tail Closure

The InvisiClose® outlet facilitates easy drainage, yet provides two levels of closure security you can trust.

Standard, approx. 21 cm (8"), Transparent, *1-sided* printed comfort panel

411637 – For stomas up to 31 mm (1¼")

Box of 10 pouches . . . . . .

** Little Ones® measuring guides are available in each box of skin barriers.*

Stomahesive® Skin Barrier

Stomahesive® Skin Barrier is a multi-purpose hydrocolloid skin barrier composed of gelatin, pectin, sodium carboxymethylcellulose and polyisobutylene laminated between polyethylene and an opaque paper backing for use as a peristomal covering with ostomies and around fistulas.

21712 – approx. 10 cm x 10 cm (4" x 4")
Box of 5 skin barriers . . . . . .

21715 – approx. 20 cm x 20 cm (8" x 8")
Box of 3 skin barriers . . . . . .

Stomahesive® Protective Powder

Stomahesive® Protective Powder is composed of gelatin, pectin and sodium carboxymethylcellulose. Stomahesive® Protective Powder helps form a protective barrier against excoriating discharge on weeping areas. Increases wear time by absorbing moisture while helping to prevent skin irritation.

025510 – Bottle of 28.3 g (1 oz) . . . . . .

Stomahesive® Paste

Pectin-based Protective Skin Barrier + Filler

Stomahesive® Paste is composed of ingredients similar to Stomahesive® Protective Powder. Stomahesive® Paste is a highly effective filler, sealant and protective skin barrier for use with colostomy and ileostomy. The paste is also used to protect exposed skin around fistula sites, between the base of the stoma and the opening in the appliance and as a filler for skin folds, uneven skin surfaces and scars.

TIP!

Immediately close the tube after each use to prevent the paste from hardening over time.

183910 – Tube of 56.7 g (2 oz) . . . . . .

AllKare® Adhesive Remover Wipe*

Adhesive Remover Wipe is a pad saturated with a unique iso-alcohol-free adhesive remover. Its formula effectively removes tape, skin barrier, and adhesive residues from the skin that can reduce wear times, and it contains emollients that leave the skin feeling soft and supple.

037436 – Box of 50 wipes . . . . . .
37443 – Box of 100 wipes . . . . . .

AllKare® Protective Barrier Wipe*

Non-water soluble formula for skin protection. Provides a barrier film on the skin under tapes, skin barriers, adhesives, and hydrocolloid dressings to help protect against irritation that may be caused by skin stripping, tension blisters, folliculitis, maceration or adhesive residue.

037439 – Box of 50 wipes . . . . . .
37444 – Box of 100 wipes . . . . . .

** AllKare® wipes do not adversely affect Stomahesive® or Durahesive® skin barrier adhesion or wearing time.*

LATEX

Eakin Cohesive® Seal*

Eakin Cohesive® seal is available as a donut-shaped ostomy accessory that can be molded to a variety of shapes. It acts as a gasket or barrier and provides enhanced protection for hard-to-fit stomas. The unique moldable hydrocolloid barrier forms a gel that helps prevent skin damage by sealing the area between the skin and ostomy appliance.

Cohesive SLIMS®

Leakage prevention, comfort and security for all types, shapes and sizes of stoma.

Cohesive® SMALL

A THICKER SEAL

Small Cohesive® Seals are the same shape and size as Cohesive SLIMS® but are thicker. They are ideal for extra skin protection, problem skin or people with significant leakage problems.

Cohesive® LARGE

DOUBLE SIZE

Large Cohesive® Seals cover a larger area of skin around the stoma providing protection over a wide area. They are ideal for people with urostomies or for people who have sensitive skin.

Cohesive® StomaWrap™

These seals are ideal for large or oval shaped stomas, for those with limited dexterity and useful in protecting skin around wounds (pictureframing).

839005 – **SLIMS™**, 5 cm (2")
Box of 10 slim seals . . . . . .

839002 – **Small**, 5 cm (2")
Box of 20 small seals . . . . . .

839001 – **Large**, 10 cm (4")
Box of 10 large seals . . . . . .

839006 – **StomaWrap™**, 8.5 cm (3")
Box of 10 large oval seals . . . . . .

Eakin Cohesive® Skin Barrier*

Eakin Cohesive® Skin Barrier is moldable and moisture-absorbing. It is designed to help protect the skin from contact with body fluids. It is used wherever the skin is damaged, excoriated or vulnerable and needs protection from body wastes and fluids.

839004 – **Small**, 10 cm x 10 cm (4" x 4")
Box of 5 skin barriers . . . . . .

839003 – **Large**, 10 cm x 20 cm (4" x 8")
Box of 5 skin barriers . . . . . .

** Please see page 44 for other Eakin Cohesive® products.*

Visi-Flow® Irrigation System

A complete irrigation system offering the advantages of flow visibility and control, easy front-filling and a removable stoma cone.

The Visi-Flow® Irrigation System is only compatible with the Natura® Irrigation Sleeves.

Visi-Flow® Irrigator

Visi-Flow® Irrigator with stoma cone is designed for persons with a colostomy for whom irrigation is indicated.

The Visi-Flow® Irrigator features a front-fill reusable bag with an exclusive "paddle wheel" flow indicator, thumb-control flow regulator, bold-print volume graduations and a flexible stoma cone attachment. Special fitting allows easy removal for cleaning.

2000 mL capacity (67 oz)

401989 – 1 irrigator with stoma cone per box . . . . . .Taxable

Visi-Flow® Stoma Cone

Stoma cone replacement for Visi-Flow® Irrigator. Visi-Flow® stoma cone is soft on the outside, tough on the inside to prevent premature collapse.

22736 – 1 stoma cone per box . . . . . .

Natura® Visi-Flow® Irrigation Sleeve

Natura® Visi-Flow® Irrigation Sleeves are made of clear film with a slide seal closure for easy entry and security and are designed for use with the Natura® system.

401911 – 38 mm (1½")
401912 – 45 mm (1¾")
401913 – 57 mm (2¼")
401914 – 70 mm (2¾")

Box of 5 irrigation sleeves (1 tail closure per box) . . . . . .

Natura® Visi-Flow® Irrigation Adapter Faceplate

For people who irrigate and prefer a one-piece system. This is to be used with a Visi-Flow® Irrigator and a Natura® Visi-Flow® Irrigation Sleeve. A belt is needed to hold the faceplate in place.

401918 – 45 mm (1¾")
401919 – 70 mm (2¾")

1 irrigation adapter faceplate per box . . . . . .

LATEX

Night Drainage Container Set

The urine collection system with the Accuseal® connection. Designed for convenient collection of urine over an extended period.

Set includes:

- 1 Night Drainage Container with tubing, capacity of 2000 mL (67 oz)
- 1 Night Drainage Container cover
- 1 Universal adapter

27060 – 1 set per package . . . . . .Taxable

Night Drainage Container Tube

To be used with night drainage container.

27062 – 1 tube, length of 147 cm (approx. 58”) . . . . . Taxable

Accuseal® Adapter*

Adapter that attaches to the Accuseal® tap on the urostomy pouch, if needed to connect to a drainage system.

21915 – Package of 2 adapters . . . . . .

Ostomy Appliance Belt

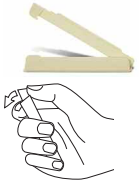

Adjustable belt designed for use with the Natura® and Active Life® Systems. Ostomy Appliance Belt made of soft, high quality, white washable material; provides added sense of security.

175507 – Suitable for sizes up to approximately 107 cm (42”)
1 belt per box . . . . . .

TIP!

The belt should be hand-washed using a mild soap and laid flat to dry.

ConvaTec Tail Closure

The ConvaTec Tail Closure has been designed with a soft comfortable feel and greater flexibility. For improved security, a clicking noise can be heard when closing the tail closure. Designed for use with drainable pouches. Prior to initial use, open and close a few times.

175635 – Box of 10 tail closures . . . . . .

Did you know?

Closing tail closures by pressing only in the middle may not lock the closure properly. You must also press down on the "head".

DuoLock® Curved Tail Closure

DuoLock® Curved Tail Closure for use with drainable pouches. This unique curved tail closure has a dual locking mechanism to prevent accidental opening and conforms to body contours.

175652 – Box of 10 tail closures . . . . . .

Natura® Visi-Flow® Irrigation Sleeve Tail Closure

Designed with a hook which allows Natura® Irrigation Sleeve to be folded upward and hung from flange for more convenient wearing, while waiting for second evacuation to occur.

175650 – Box of 10 tail closures . . . . . .

** Please contact the ConvaTec Customer Relations Center at 1 800 465-6302 to order the Accuseal® adapter.*

Natura® Postoperative Kit, Non-Sterile*

Each kit contains:

Feel the difference!

GentleCath™ is designed to make catheter insertion and removal as smooth and easy as possible for the patient.

- Polished and rounded eyelets minimise friction.
- Soft, rounded tip aids smooth insertion.
- Available in male and female straight tip and male coudé tip, for insertion through complicated passages.

See the difference!

- Color coded connector for easy FR size identification.
- Available in a wide range of sizes to meet your patients' needs.
- Fits drainage bags or other devices.

LATEX

AQUACEL® Foam Hydrofiber® Dressing, Sterile

Hydrofiber® TECHNOLOGY

Non-Adhesive

Adhesive

Adhesive Heel

Adhesive Sacral

AQUACEL® Foam Dressing offers a range of sterile, adhesive and non-adhesive absorbent foam wound dressings consisting of 4 different components: 1) a waterproof and bacterial/viral barrier polyurethane top layer which protects the wound from external contaminants, reducing the risk of infection. The top layer also helps to manage the moisture vapour transmission of the exudate absorbed by the dressing; 2) a soft absorbent foam pad; 3) an AQUACEL® wound interface made of Hydrofiber® Technology (sodium carboxymethylcellulose) which creates a soft, cohesive gel that intimately micro-contours to the wound bed, maintains a moist environment in the wound to support the body's healing process and aids in the removal of non-viable tissue from the wound (autolytic debridement) without damaging newly formed tissue; 4) and a gentle silicone adhesive border for the adhesive dressing range which provides secure, skin-friendly adhesion to the surrounding skin and not on the wound bed thereby supporting non-traumatic dressing removal.

AQUACEL® Foam

AQUACEL® Foam dressings may be used as primary or secondary dressing for the management of both chronic and acute wounds, such as leg ulcers, pressure ulcers (Stages II-IV) and diabetic ulcers; surgical wounds (post-operative, donor sites, dermatological); partial thickness (second degree) burns; traumatic or surgical wounds left to heal by secondary intention such as dehisced surgical incisions; surgical wounds that heal by primary intent, such as dermatological and surgical incisions (e.g. orthopaedic and vascular); etc (see package insert for complete instructions for use).

Non-Adhesive:

420631 – Box of 10 dressings, approx. 5 cm x 5 cm (approx. 2" x 2")
420633 – Box of 10 dressings, approx. 10 cm x 10 cm (approx. 4" x 4")
420635 – Box of 5 dressings, approx. 15 cm x 15 cm (approx. 6" x 6")
420637 – Box of 5 dressings, approx. 15 cm x 20 cm (approx. 6" x 8")
420636 – Box of 5 dressings, approx. 20 cm x 20 cm (approx. 8" x 8")
421156 – Box of 5 dressings, approx. 10 cm x 20 cm (approx. 4" x 8")

Adhesive:

420804 – Box of 10 dressings, approx. 8 cm x 8 cm (approx. 3.2" x 3.2")

AQUACEL® Surgical Cover Dressing, Sterile

AQUACEL® Surgical cover dressing is a sterile post operative dressing comprised of an inner (wound contact) non woven pad incorporating Hydrofiber® Technology. The pad is composed of sodium carboxymethylcellulose stitch bonded with nylon and elastane yarns. The pad is held in place between a top layer of hydrocolloid which is bound to an outer polyurethane film and a windowed skin contact layer consisting of polyurethane film sandwiched between two further layers of hydrocolloid.

AQUACEL® Surgical cover dressing is a waterproof, bacterial and viral barrier dressing which is designed to conform to changes in the wound/incision geometry during body movement and post operative edema.

AQUACEL® Ag+ Extra™, Sterile

AQUACEL® Ag+ EXTRA™ Enhanced Hydrofiber™ Dressing with Silver and Strengthening Fibre is a soft, sterile, non-woven dressing made from two layers of sodium carboxymethylcellulose impregnated with 1.2% ionic silver (an antimicrobial agent), enhanced by ethylenediaminetetra-acetic acid di-sodium salt (EDTA) and benzethonium chloride (BeCl), and strengthened by regenerated cellulose fibre. This dressing absorbs high amounts of wound fluid and bacteria and creates a soft, cohesive gel that intimately conforms to the wound surface, maintains a moist environment and aids in the removal of non-viable tissue from the wound (autolytic debridement). A moist wound environment and control of wound bacteria supports the body's healing process and helps reduce the risk of wound infection. The ionic silver in the dressing kills pathogenic microorganisms, both planktonic and within bacterial biofilms, including wound bacteria, yeasts and moulds. The dressing also disrupts and absorbs biofilm, prevents biofilm formation/reformation and increases the efficiency of silver transfer to microorganisms. The dressing itself also provides an antimicrobial barrier to protect the wound bed.

AQUACEL® Hydrofiber® Wound Dressing, Sterile

AQUACEL® Dressings

AQUACEL® Hydrofiber® Dressing is a sterile, white, fibrous dressing derived from 100% pure sodium carboxymethylcellulose (NaCMC). AQUACEL® dressing combines the look, feel and handling properties of gauze and leading alginates, but retains more fluid than alginates and almost three times more fluid than gauze when used under compression. AQUACEL® dressing is indicated for the management of abrasions, lacerations, and under the supervision of a healthcare professional, for pressure ulcers, leg ulcers, incisions, donor sites and second degree burns as well as on infected wounds and for use in managing surgical or traumatic wounds that have been left to heal by secondary intention. Additionally, it can be used on wounds prone to bleeding and to facilitate the control of minor bleeding.

TIP!

AQUACEL® & AQUACEL® Ag dressings can be used under DuoDERM® Hydrocolloid dressings.

177901 – Box of 10 dressings, approx. 5 cm x 5 cm (approx. 2" x 2")
177902 – Box of 10 dressings, approx. 10 cm x 10 cm (approx. 4" x 4")
177903 – Box of 5 dressings, approx. 15 cm x 15 cm (approx. 6" x 6")

AQUACEL® Hydrofiber® Ribbon Dressing with Strengthening Fiber, Sterile

AQUACEL® Dressings with Strengthening Fiber have all the advantages of the original AQUACEL® Ribbon Dressings and now, even more strength. Indeed, stitch bonding has been added to strengthen the original AQUACEL® Ribbon Dressings. By doing so, the dressings will:

- Be over 20 times stronger*
- Have more than 1.3 times less shrinkage*

403770 – Box of 5 dressings, approx. 2 cm x 45 cm (approx. ¾" x 18")
420127 – Box of 5 dressings, approx. 1 cm x 45 cm (approx. 0.39" x 18")

AQUACEL® Ag Hydrofiber® Ribbon Dressing with Silver, Sterile

AQUACEL® Ag Dressings

AQUACEL® Ag dressing is an absorbent **antimicrobial** dressing that features all of the benefits of AQUACEL® dressing with the important addition of ionic silver. AQUACEL® Ag dressing kills a broad spectrum of wound pathogens (microbicidal) in the dressing that can cause infection including Methicillin Resistant Staphylococcus Aureus (MRSA) and Vancomycin Resistant Enterococcus (VRE)[1]. AQUACEL® Ag dressing's antimicrobial is conveniently available within the exudate management dressing eliminating the need for the application of both an antimicrobial product to control bacteria and a dressing to manage exudate.

Did you know?

You can use AQUACEL® Ag dressing in a wound that has been cleansed with either sterile water or sterile normal saline.

AQUACEL® Extra™ Hydrofiber® Dressing with Strengthening Fiber, Sterile

AQUACEL® Extra™ Dressing with Strengthening Fiber is a soft, sterile, non-woven dressing made from two layers of Hydrofiber® (sodium carboxymethylcellulose) dressing stitched together with strengthening fibers. This conformable and highly absorbent dressing absorbs wound fluid and creates a soft cohesive gel that intimately micro-contours to the wound bed, maintains a moist environment which supports the body's healing process and aids in the removal of necrotic material from the wound (autolytic debridement) without damaging newly formed tissue. AQUACEL® EXTRA™ dressing is designed to make it 9X stronger and provides an increased absorbency of 39% higher than current AQUACEL® dressing.[1]

420671 – Box of 10 dressings, approx. 5 cm x 5 cm (approx. 2" x 2") . . . . . .
420672 – Box of 10 dressings, approx. 10 cm x 10 cm (approx. 4" x 4") . . . . . .
420673 – Box of 5 dressings, approx. 15 cm x 15 cm (approx. 6" x 6") . . . . . .

AQUACEL® Ag Extra™ Hydrofiber® Dressing with Strengthening Fiber, Sterile

AQUACEL® Ag Extra™ Dressing with Silver and Strengthening Fiber is a soft, sterile, non-woven dressing made from two layers of ionic silver impregnated Hydrofiber® (sodium carboxymethylcellulose) which are stitched together with strengthening fibers. This conformable and highly absorbent dressing absorbs wound fluid and creates a soft cohesive gel that intimately micro-contours to the wound bed, maintains a moist environment which supports the body's healing process and aids in the removal of necrotic material from the wound (autolytic debridement) without damaging newly formed tissue. The silver in the dressing kills wound bacteria held in the dressing, and provides an antimicrobial barrier to protect the wound bed. AQUACEL® Ag Extra™ dressing is designed to make it 9X stronger and provides an increased absorbency of 50% higher than current AQUACEL® Ag dressing.[2]

AQUACEL® Ag Burn Dressing, Sterile

The AQUACEL® Ag Burn Hydrofiber® Dressing reinforced with nylon, silver-impregnated, antimicrobial, absorbent dressing is a soft, sterile, non-woven hydroentangled dressing comprised of Hydrofiber® (sodium carboxymethylcellulose) with nylon thread used to stitch bond the product along the length. The dressing contains 1.2% w/w ionic silver. The silver in the dressing kills a broad spectrum of wound bacteria. This dressing absorbs high amounts of wound fluid and bacteria and creates a soft, cohesive gel that intimately conforms to the wound surface, maintains a moist environment and aids in the removal of non-viable tissue from the wound (autolytic debridement).

Under the supervision of a healthcare provider, the AQUACEL® Ag Burn Hydrofiber® Dressing is indicated mainly for the management of partial thickness (second degree) burns and wounds that are prone to bleeding, such as wounds that have been mechanically or surgically debrided and donor sites. Additionally, it can also be used for other indications such as diabetic foot ulcers, leg ulcers (venous stasis ulcers, arterial ulcers and leg ulcers of mixed etiology), pressure ulcers/sores (partial & full thickness), surgical wounds left to heal by secondary intention such as dehisced surgical incisions, surgical wounds that heal by primary intention such as dermatological and surgical incisions (e.g., orthopedic and vascular), traumatic wounds, oncology wounds with exudate (e.g. fungoides-cutaneous, tumors, fungating carcinoma, cutaneous metastasis, Kaposi's sarcoma, and angiosarcoma), infected or painful wounds.

KALTOSTAT® Calcium Alginate Wound Dressing, Sterile

KALTOSTAT® wound dressing is a soft, sterile non-woven pad or ribbon dressing of calcium-sodium alginate fibre. The alginate fibres absorb wound fluid and form a moist environment at the wound interface. It may be used for minor abrasions, lacerations, scalds and burns, and under the supervision of a healthcare professional, for stage II to IV pressure ulcers, venous ulcers, arterial and diabetic ulcers, donor sites, surgical incisions, and traumatic wounds. Upon contact with a bleeding wound, KALTOSTAT® dressing promotes hemostasis.

COMPRESSION BANDAGES

SurePress® High Compression Bandage

REUSABLE

SurePress® High Compression Bandage is designed for use over a primary wound dressing for patients with impaired venous return. It is an elasticized, reusable bandage with a yellow center line and two rectangular extension indicators for different size limbs. It delivers 35-45 mmHg sustained compression.

Did you know?

The SurePress® High Compression Bandage can be washed up to 20 times. (hand-washed and laid flat to dry)

650947 – 10 cm x 3 m (4” x 3.2 yards) unstretched . . . . . .

SurePress® Absorbent Padding

A soft non-woven and absorbent bandage composed of a blend of viscose / bicomponent and super-absorbent fibers. This bandage protects the skin, provides additional absorption and even distribution of pressure under the SurePress® High Compression Bandage.

Did you know?

The SurePress® Absorbent Padding helps to distribute graduated compression and protect skin from exudates leaking from the primary dressing.

650948 – 10 cm x 3 m (4” x 3.2 yards)
Box of 6 bandages . . . . . .

Aloe Vesta® Body Wash & Shampoo

ALOE VESTA®

Dispensing Pump: #100543

Aloe Vesta® Body Wash & Shampoo is a pH balanced formula designed to condition, soothe and moisturize the skin. Its formula is gentle to skin and hair and may be used for routine tub and shower bathing, or for no-rinse bathing and shampooing.

401865 – Case: 48 x 118 ml (4 oz.)
401866 – Case: 48 x 236 ml (8 oz.)
401867 – Case: 4 x 4 L (1 gal.)
324612 – Case: 8 X 1L (34 oz) **NEW**

Aloe Vesta® Cleansing Foam

Aloe Vesta® Cleansing Foam is a total body cleansing, no-rinse pH balanced formula, designed to soothe and moisturize. It is easy to use, provides rich foaming action while still being gentle to skin and hair.

325204 – Case: 24 x 118 ml (4 oz.)
401871 – Case: 12 x 236 ml (8 oz.)

Aloe Vesta® Perineal / Skin Cleanser

Dispensing Pump: #100543

Aloe Vesta® Perineal/Skin Cleanser is a no-rinse pH balanced formula, designed to soothe and moisturize while cleansing. Its lemon fragrance also helps with the management of odours.

401868 – Case: 48 x 118 ml (4 oz.)
401869 – Case: 48 x 236 ml (8 oz.)
401870 – Case: 4 x 3.6 L (approx. 1 gal.)

Sensi-Care® Perineal / Skin Cleanser

SENSI-CARE®

Dispensing Pump: #100543

Sensi-Care® Perineal/Skin Cleanser is a no-rinse pH balanced formula that is ideal for fragile, sensitive skin. It is designed to soothe and moisturize while cleansing.

401882 – Case: 48 x 118 ml (4 oz.)
401883 – Case: 48 x 236 ml (8 oz.)

Aloe Vesta® Daily Moisturizer

ALOE VESTA®

Dispensing Pump: #100543

Aloe Vesta® Daily Moisturizer is a lanolin and fragrance-free product formulated to soften and moisturize the skin, and to maintain that condition by slowing down the drying of the skin.

401872 – Case: 48 x 118 ml (4 oz.) . . . . . .
401873 – Case: 48 x 236 ml (8 oz.) . . . . . .

Aloe Vesta® Protective Ointment

ALOE VESTA®

Aloe Vesta® Protective Ointment soothes, moisturizes, helps protect skin from irritants and seals out moisture. Routine use of this fragrance-free formula helps to maintain healthy looking skin.

401898 – Case: 24 x 59 ml (2 oz.) . . . . . .
401899 – Case: 12 x 236 ml (8 oz.) . . . . . .

Sensi-Care® Protective Barrier

SENSI-CARE®

Sensi-Care® Protective Barrier is a fragrance-free occlusive formula which seals out moisture and helps protect skin from irritants. It is ideal for sensitive skin and contains petrolatum and 15% zinc oxide.

325614 – Case: 24 x 102 ml (3.5 oz.). . . . . .

Did you know?

Cleansing & moisturizing are vital to protect the skin.

GLOSSARY

OSTOMY CARE TERMS	DEFINITION
Adhesive Coupling Technology™ (ACT)	A two-piece ostomy pouching system that sticks together with a tape-like adhesive rather than a plastic ring.
Appliance	The pouch or bag worn over the stoma (often called an ostomy pouching system).
Closed-end (pouch)	A pouch that has no opening at the bottom and is removed and thrown away after each use. This makes them ideal for special occasions, intimate moments, or for everyday use. Some are offered with a filter designed to reduce odor and gas buildup.
Comfort panel	A fine plastic mesh on one or both sides of the pouches, feels silky and comfortable on the skin. Closed-end pouches have a cotton-like finish.
Convexity	The outward curving of a faceplate which begins at the aperture of the faceplate and extends outward.[1]
Cut-to-Fit	The opening of the skin barrier or appliance needs to be enlarged (using scissors) to match the stoma size.
Drainable (pouch)	Has an opening at the bottom which allows stool or urine to be drained and re-closed with a clip or self gripping fastener hook tape, thus can be re-used. Urostomy pouches are drained by the valve or tap.
Durahesive® skin barrier	A durable hydrocolloid skin barrier designed to help manage liquid output. The skin barrier is resistant to caustic effluent.
Filter	Round piece of charcoal built-in to some pouches that helps release gas and/or odor and prevents the pouch from filling with air.
Flange	The plastic connector ring on the ostomy skin barrier or pouch.
InvisiClose® tail closure	A clipless pouch that is closed via an integrated interlocking system.
Moldable	No scissors are needed to size a moldable skin barrier. The adhesive can be molded or shaped to the size of the stoma using one's fingers.
One-piece system	The skin barrier and pouch are combined into one unit for a one-step application. It is flexible and offers a low profile. The pouch cannot be removed without removing the skin barrier/wafer.
Peristomal skin	The skin surrounding a stoma.
Pre-Cut	The opening of the skin barrier or appliance is already cut to match the stoma size (No need of scissors).
Skin barrier	Wafer portion of an ostomy system that is in direct contact with the skin. It helps protect the skin around the stoma and provides a secure, leak-resistant seal with the pouch.[2]
Skin protective barrier	A wipe or spray that forms a protective film on skin to help prevent skin breakdown by shielding it from irritating or caustic substances.
Stomahesive® skin barrier	A hydrocolloid skin barrier designed to adhere to wet/dry areas and is ideal for protection of the skin around the stoma.
Two-piece system	The skin barrier/wafer and pouch are separate and attached together with a round, plastic ring (called a flange) or by adhesive coupling. The pouch can be easily removed without also having to remove the skin barrier/wafer.

GLOSSARY

WOUND & SKIN CARE TERMS	DEFINITION
Bactericidal	Bacteria will be killed and therefore growth will not restart when contact with the antimicrobial agent is stopped.
Bacteriostatic	Bacterial growth will be inhibited, but will start again when contact with the antimicrobial agent is stopped.
Biofilm	Biofilm describes surface-adherent bacteria, encased in and protected by an extracellular polymeric substance (EPS) composed of polysaccharides, DNA and proteins.
Contamination	Soiling by contact or introduction of organisms into a wound.[1]
Hydrocolloid	A substance that yields a gel with water.[2]
Hydrofiber® Technology	The Hydrofiber® Technology is exclusive to ConvaTec. It is composed of 100% pure sodium carboxymethylcellulose. It is the underlying technology behind AQUACEL®, AQUACEL® Ag, AQUACEL® Surgical, AQUACEL® Ag Surgical dressings.
Infection	An overgrowth of microorganisms capable of tissue invasion and destruction. Local and systemic symptoms[1] may be observed.
Microbicidal	Bacteria, yeasts and fungi will be killed and therefore growth will not restart when contact with the antimicrobial agent is stopped.
Partial-thickness burn	(Second degree): A burn that damages the epidermal and some dermal tissues but does not damage the lower-lying hair follicles, sweat or sebaceous glands.[3]

Explanation of **CONVATEC** Package Code Numbering System

LOT NUMBERS

Every ConvaTec product carries a lot number that serves to indicate when the item was produced, and from which a complete history as well as expiration date of the product can be derived.

Most products use the following format:

Example - Lot number **9J00978**

9 = Year (2009)

J = Month (September)

00978 = Lot number assignment for positive identification of each lot produced

Expiration Designation:

- If an expiration date is noted on the box, it will appear below the lot number.
- If an expiration date is *not* noted on the box, it can be derived by adding five years to date of manufacture of product. See above for details on manufacture dates.

Example: If date of manufacture is determined as September 2009 (ex. 9J), the product's shelf life will be until September 2014; however, limit to return the product is *six months prior* to this date which would be: March 1, 2014 .

A - January	B - February	C - March	D - April
E - May	F - June	G - July	H - August
J - September	K - October	L - November	M - December

Please contact your ConvaTec Territory Manager or Customer Relations Center at 1 800 465-6302 for clarification of control numbers or expiration dates.
